## Two Bed Demineraliser

**882a** A set of PVC /FRP columns, charged with high exchange capacity cation & anion resin with prefilter. It softens the hard water and provides good quality water for use in labs. Specially designed for easy serviceability and recharging the resin with solution. The soft water can be used as feed water to the distillation unit. The use of hard water in Boilers, would leave the boiler with lot of scaling and sedimentation, hence to improve the quality of distillate and for longer life of the glass/heaters, **it is recommended to use softened water. for Cat. No. 881a, 882 and 883**
